VDO

Plug & Play Service

Plug it in, start it and go to work. Computer users are familiar with this principle. Now Continental has transferred it to workshop processes, creating a completely new product category: Plug & Play Service.

Key services are radically simplified across all major manufacturers. Work is much simpler, and workshops can perform their tasks faster and more efficiently.

Autodiagnos Check

Autodiagnos Check is the first Plug & Play service unit from VDO. It gives you instant access to vehicle systems. It's ease of use allows you to work faster and more efficient, making it ideal for any workshop and employee. Servicing cannot be made any easier.

Plug & Select

Just plug it in and right away, you'll have all of the important fast-check functions at your fingertips. For example, service, engine or steering. Tap the area you need and the VDO Autodiagnos Check will guide you through the service process. You won't be distracted by complicated options or misleading suggestions.

Plug & Identify

VDO Autodiagnos Check can be used without having a detailed knowledge of manufacturers. You just select the vehicle maker and the system automatically identifies the model, year built and associated control units. All the important services are covered, whatever the manufacturer.

Plug & Fix

No more complicated and time-wasting functions. The VDO Autodiagnos Check is like an electronic screwdriver. It takes you straight to the applications you need, helping to make your service business efficient and profitable.

Rugged housing, easy operation.

Large colour display

- 5" low-reflection colour screen
- Wide viewing angle
- Intuitive operation

Flexible, shielded OBD cable

- Protected against bending
- Connection point at top of unit for better handling outside the vehicle
