AUTODIAGNOS

Serial application OBD v3.15

Plus-Line kit 904x contents
- Software activation code

Functionality
- Auto Configuring. No system protocol or vehicle selection required
- Protocols supported: ISO9141, CAN, KWP2000, J1850VPW, J1850PWM
- Read fault codes
- Erase fault codes
- Read data stream
- View freeze frame data
- Readiness test
- Oxygen sensor test results
- Continuous test results
- Non-continuous test results
- Snapshot function
- DTC's with extended help text
- Help text for acronyms and OBD standards

Vehicle Coverage
- Most European, US and Asian OBD and EOBD compliant models

System Coverage
- Most OBD / EOBD compliant systems can be diagnosed; the standard covers powertrain systems (engine and transmission) only. For diagnosing other vehicle systems like ABS, SRS or immobilisers you will require specific Autodiagnos applications.
