

## **Remote Fob Programming (Plips) – Peugeot and Citroen**

Following transponder key programming it may be necessary to learn the high frequency remote locking PLIP feature. The procedures for each model are detailed below.

### **206, Xsara and Xantia Central Locking (1 button PLIP)**

- Unlock all doors using a working key.
- Depress and hold the PLIP button until the LED stops flashing.
- Release, and press the button once, and the LED will extinguish.
- Insert the key in the ignition barrel and switch to the ON position, wait 10 seconds then switch to OFF
